Looking for a three-month internship in machine learning and artificial intelligence from 06/2027

Education

École Polytechnique

Palaiseau, France

Diplôme d'Ingénieur (Master's Degree in Engineering, MSc)

09/2025 to expected 06/2029

- Specialise in applied mathematics, computer science, artificial intelligence and quantitative finance.

École Militaire des Aspirants de Coëtquidan

Guer, France

Officer Cadet, military leadership and management training

08/2025 to 11/2025

- Trained as an officer candidate in the French Army over four months in crisis leadership, tactical execution and communication under pressure.

Lycée Janson de Sailly

Paris, France

Classes Préparatoires aux Grandes Écoles (intensive undergraduate programme preparing the competitive entrance examinations for the top French universities)

09/2022 to 07/2025

- Studied advanced mathematics, physics and computer science under a selective, high-intensity workload.
- Ranked 18th nationwide at the École Polytechnique entrance examination.

Lycée Fabert

Metz, France

French Baccalauréat (equivalent to A-levels), mathematics, computer science and physics

09/2019 to 07/2022

- Awarded with Highest Honours (*Mention Très Bien*).

Experience

Competitive Programming and Algorithm Design

École Polytechnique, Palaiseau, France

Competitor and Algorithmic Developer

07/2026 to present

- Advanced algorithmic problems solving in C++.
- Preparing for European and International university programming contests SWERC and ICPC.

Student Union and Campus Societies

École Polytechnique, Palaiseau, France

Systems Administrator

04/2026 to present

- Administer Linux servers and web services used by over 500 active students.
- Advise student societies on hosting, access management and data backup.

X-AI Hackathon

Paris, France

Machine Learning Engineer

09/2026

- Built an agentic AI system from scratch, combining a large language model with Pipelex.

Quantum Physics Machine Learning Hackathon

Paris, France

Machine Learning Engineer,

09/2026

- Developed and trained deep learning models on quantum physics simulation data within a 48-hour deadline.

Additional Skills

Computer skills

- Machine learning:** PyTorch, scikit-learn.
- Programming:** Python, C, C++, OCaml, Java, SQL.
- Tools and platforms:** Git, GitHub, Docker, Linux, LaTeX.

Languages

- French:** native speaker.
- English:** advanced (C1).
- Spanish:** intermediate (B2).

Interests and Activities

Endurance running, mountain biking, alpine hiking and bivouac, reading (popular science and classic literature), photography.
